TITLE : INTRUSION MONITORING DEVICE
AND SENSOR FOR THE DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide an intrusion monitoring device surely detecting an intruder when the intruder existing at a monitored part moves.

SOLUTION: This device is provided with a sensor 11 outputting a signal at different levels corresponding to whether an intruder exists or not at a protective wall 2 being the monitored part and an alarming device 12 outputting a prescribed alarm based on an output signal from the sensor 11. When the alarming device 12 recognizes the level change of an intrusion detection signal outputted from the sensor 11 after a monitoring time passes, the alarming device 12 outputs an alarm at the point of the time recognizing the level change at first after the monitoring time passes.
